

JOB DESCRIPTION

LOCATION:

Zwolle, Netherlands

R&D POLYMER CHEMIST

Within the AOC Aliancys R&D department in Zwolle we are looking for a new colleague. We are strengthening our innovation efforts in customer and production support and strategic fields like Styrene Free and Carbon Fiber Composites.

As R&D Polymer Chemist you will work in international and multi-disciplinary teams for different application segments. You will support and/ or perform application experiments for innovation projects, for technical service and/or for production support.

POSITION

- Lead and participate in product/ technology development projects in close contact with R&D management and the business
- Provide support for new product launches and inquiries from internal as well as external customers
- Formulate and test newly developed resins
- Maintain and operate specialized laboratory equipment. Keep equipment and other utilities in good conditions
- Take care of laboratory logistics and housekeeping
- Regular reporting and good project administration
- Comply fully to responsibilities and authorities on safety and quality
- Full time position

WE LOOK FOR

- Polymer Chemist (M.Sc.) with at least 4 years working experience in industrial composite research
- Experience with leading product development projects is required: proven track record in product development
- Required knowledge: studies on cure behavior and relevant analytical tools, formulations, structure-property relations
- Willingness to perform or learn synthesis of polyesters
- Very good interpersonal and communication skills with excellent customer service and "can do" mentality
- Pro-active attitude and hands-on mentality

OUR COMPANY
