

## JOB DESCRIPTION

### LOCATION:

**Zwolle, Netherlands**

### R&D POLYMER OR ORGANIC CHEMIST

**Within the Aliancys R&D department in Zwolle we are looking for a new colleague. We are strengthening our innovation efforts in customer and production support and strategic fields like Styrene Free and Carbon Fiber Composites.**

**As R&D Scientist you will work in international and multi-disciplinary teams for different application segments. You will support and/ or perform synthesis experiments for innovation projects, for technical service and/or for production support.**

### POSITION

- Lead and participate in product/ technology development projects in close contact with R&D management and the business
- Provide support for new product launches and inquiries from internal as well as external customers
- Provide support to production and pilot plant in the scale-up of R&D products
- Maintain and operate specialized laboratory equipment. Keep equipment and other utilities in good conditions
- Take care of laboratory logistics and housekeeping
- Regular reporting and good project administration
- Comply fully to responsibilities and authorities on safety and quality
- Full time position

### WE LOOK FOR

- Polymer or Organic Chemist (B.Sc., M.Sc. or Ph.D.) with at least 8 years working experience in a relevant field.
- Potential to grow into the position of polyester synthesis expert within the R&D department (senior chemist).
- Experience with leading product development projects and experience with polycondensation chemistry are required.
- Experience with upscaling and production support is also required.
- Proven track record in product development
- Very good interpersonal and communication skills with excellent customer service and "can do" mentality
- Pro-active attitude and hands-on mentality
